

Condor

(Focus: free stroke arpeggios with p-i-m-a combinations)

Practice Tips:

Try Condor with different finger combinations such as p-a-m-i or p-m-i-a (changing the order of the notes as well so that your right hand fingers continue to play on the same strings). Practice the right hand alone on open strings while you observe the movement of your fingers. Your right hand should be still as only your fingers move to play the notes.

Amazing Animal Facts:

*In 1982, there were fewer than 25 Condors left in the wild. Today, their numbers have increased to approximately 200.

*Their wings can span more than nine feet (3 meters).

*Condors breed once every two years, producing only one egg.
